Summary

Recent computer science graduate with a strong foundation in computer science principles, data structures, algorithms, and problem-solving looking for full-time roles. Passionate about software engineering and eager to apply my knowledge and skills to design, develop, and deliver high-quality software solutions.

Education

Long Beach California State University

B.S Computer Science

Long Beach, CA

Oct 2019 - Dec 2023

- Emphasis on Security and Machine Learning

Experience

Student Technology Help Desk at Long Beach City College

Student Assistant II

Long Beach, CA

Oct 2019 - Dec 2023

- Educate students on software, hardware, and preventative maintenance solutions for added user security i.e. email phishing and password management.
- Support students with SAAS products i.e. Office 365, LMS(Canvas), OWA, Citrix, Zoom, and PeopleSoft.
- Document every step of the problem-solving process by data log and email, including all decisions and actions that were made that were effective and those that were unsuccessful, up to the point at which the problem was eventually resolved.

Projects

Olague Concrete Inc

- Created a landing page via React which increased credibility to potential clients by showcasing past projects.
- Created a quote request form that sent client submissions to contractors via email and led to an increase in projects.

CochiLoco

- Web app that helps beginners learn the 31 button accordion instrument by showing the scales needed to learn first

Extra-Curricular Activities

SHPE

- Active Member contributing to the organization and community

Skills

Programming Languages: Python, C/C++, Javascript, SQL, NoSQL

Software: VSCode, Github, Jira,
